

Asi Krinitz

Full Stack Developer | Angular & ASP.NET

AsiKrinitz@gmail.com 052-7458800 Haifa, Kiryat Haim
GitHub LinkedIn AsiWebsite

Professional Summary

Production-oriented Full Stack Developer with 3+ years of experience building and maintaining enterprise web applications using **Angular**, **ASP.NET** MVC, **SQL Server**, and REST APIs.
Experienced in developing scalable frontend and backend solutions, integrating third-party services, optimizing databases, and improving production system stability and performance.
Hands-on developer with strong problem-solving skills and experience working across the full development lifecycle in fast-paced environments.

Tech Stack

Frontend
Angular (v5-18), React, HTML5, CSS3.
Backend
ASP.NET MVC (.NET Framework 4.8), Node.js (Express), NestJS – REST APIs.
Databases
SQL Server, MongoDB.
Programming Languages
TypeScript, JavaScript, C#.
Tools & DevOps
Git, GitHub, IIS (deployment), Postman (API testing), NVM, RDC.
AI-Assisted Development
Claude Code (VS Code), agentic coding workflows.

Professional Experience

Go-Net, Full Stack Developer — Jan 2023 – Present

- Developed and maintained production **Angular** applications (v5-18) used by a large enterprise client, improving UI/UX and system stability.
- Developed and maintained **ASP.NET** MVC (.NET Framework 4.8) applications, controllers, and Web APIs, handling business logic, authentication, and external integrations.
- Designed and optimized **SQL Server** databases, stored procedures, and query performance.
- Used **GitHub** for source control and team collaboration, managing branches and resolving merge conflicts.
- Implemented third-party services for OTP, SMS delivery, and SMTP-based email notifications.
- Implemented **Tranzila payment API** integrations (credit card, Bit app, token-based payments, installment plans, verify CC, refunds) and handled related production flows.
- Integrated **Histadrut APIs** for real-time member data validation.
- Implemented reliable server-side file upload and download.
- Refactored legacy frontend and backend code, reducing bugs and improving maintainability and performance.
- Deployed and maintained production and test systems via IIS, supported releases and version management (backups).
- Accelerated development and refactoring with Claude Code by breaking down tasks, guiding implementation, and reviewing AI-generated code.
- **WhatsApp Integration:** Built an in-house messaging system using Meta's API to send automated course notifications, process replies, and manage customer chats directly inside the admin dashboard.

Programming Languages – Additional Knowledge

- **Java** – Strong academic foundation (3 years) including OOP, data structures, algorithms, and object-oriented design.
- **Python** – Academic background with hands-on teaching experience, including core programming concepts, functions, control flow, and OOP fundamentals.

Projects

JobFinder – Full-stack job platform – Final college project
Watch a short video where I explain my project on my **website** .

Tech Stack:
Frontend: **Angular**
Backend: **Node.js** (Express)
Database: **MongoDB**
Auth & Security: Auth0 (Authentication & Authorization)
Version Control: Git, GitHub

- Developed and deployed a full-stack job platform supporting job posting, search, and candidate application workflows for employers and job seekers.
- Implemented authentication and authorization with Auth0, including secure login, role-based access, and protected routes in both Angular and Node.js APIs.
- Developed RESTful APIs with Node.js (Express) and a responsive Angular frontend featuring routing, forms validation, and dynamic UI flows.
- Managed deployment lifecycle including domain purchase, server setup, IIS deployment, and maintenance via Remote Desktop (RDC).
- Used Git and GitHub for source control, maintaining separate repositories for the Angular frontend and Node.js backend, with frequent commits for new features, fixes, and versions.

Personal Portfolio Website

Tech Stack:
React, **NestJS**, REST APIs, Axios, TypeScript, HTML, CSS

• Developed a personal portfolio application using React with integrated backend communication via NestJS APIs.
• Implemented REST API interaction using Axios (GET, POST), enabling dynamic client-server data flow.
• Focused on clean UI, responsive layout, and clear presentation of technical experience.
• Deployed the project publicly and maintained it via GitHub.

Education & Certificates

ORT Kiryat Bialik College, Diploma in Software Engineering 2021 – 2023
- Graduated with honors.
- Selected for an excellence program for top students.

College Of Management Haifa, Certified Computer Technician May 2025 – Nov 2025
- Certified Computer Technician.
- MCDST – Microsoft Certified Desktop Support Technician.

Military Service

Air Defense Warrior – IDF, Mar 2015 – Mar 2018
Operated the Patriot air and missile defense system.
